

One connected system for student life.

Stud-Net turns fragmented student life into one system: community, operational infrastructure, expert-guided AI and services. Built to scale across institutions and markets, starting in Israel and expanding through Europe and beyond.

WHY IT IS HARD TO COPY - FOUR LAYERS, BUILT TOGETHER

Distribution

Direct access to active student communities.

Infrastructure

Management, automation and routing that already runs.

Engagement

Daily usage and real, returning members.

Commercial network

Trusted relationships around the community.

COMMERCIAL VALIDATION

500+

commercial offers & inbound interest

20+

opportunities with large orgs, advanced stages

- Performance-based revenue model already live: \$100 to \$250 per qualified customer.
- Community activity and hosting with recognized institutions.
- Expert-guided AI: experts build and validate the knowledge, AI distributes it at scale.

THE OPPORTUNITY

Student life runs on messaging, and no one owns the operating layer. Students already live inside fragmented groups, course sites and scattered tools. Stud-Net is the connected home that follows the student across the whole journey, and the same system replicates across institutions and countries.

TEAM

Founder-led. A co-founder and a team of ten, with an academic, business and legal advisory shell.
